Community Garden Survey

Please fill out both sides of this quick survey and return with the enclosed self-addressed stamped envelope. Thank you.

Your age: 64

Is this your first year with our community garden? Yes No

Is this garden for you individually or for your family as well? I live alone but share w/

If family, how many are in your family? Adults 1 Children _____

What did you grow in the garden? peppers, onions, tom. cukes,

zuc., yellow squash, lettuce

Were you able to understand the written information included in this mailing? Yes No

Is this information helpful with your gardening? Yes No

Taking part in a community garden can provide many benefits.

Please check any/all that apply:

- I learned a new skill-how I can grow food & plants
- I learned I can eat more healthily by growing and eating locally grown produce
- I learned I can save money by growing my own produce
- Having a community garden can be relaxing and fun (though I have carpel tunnel + tennis elbow making it sometimes rough)
- I would do this again

Please share any other comments you may have to improve your experience and our garden:

many people who have garden plots aren't picking ripe vegs + their wasting resources. (a + labor) most aren't weeding either + noticed.

Name (optional): I go every couple of days now to water.
