

From the Desk of:

Emily Fagle, Finance Director

383 Broadway, Fort Edward, NY 12828

Finance Committee Meeting Minutes: 01/26/2023

Members in Attendance: Jeff Meyer, Bob Dingman, Sam Hall, Krystyna Roberts Staff present: Emily Fagle, Finance Director; Shelley Smith, Executive Director Guest Presenters: Sheila Grant and Jim Brown, NBT Bank; Matt Pine, EPIC

This meeting was held virtually via Microsoft Teams. The meeting begin at 10:00 with introductions. NBT's presentation began at 10:06am

Global Economic Outlook

- Economic activity at the end of Q4 2022 (holiday season) lagged behind expectations
- Economic growth slowing, volatility will remain elevated
- Inflation being reeled in- but pockets where its persistence (oil)
- Equity valuations are an attractive investment, though if we fall into (a predicted) deep economic recession, equity valuations would suffer.
- Fixed Assets attractive highest bond yields in over a decade

Investment Performance

- We're on par with the benchmark (blended index), with the exception of the December 1 month figures (though only a small variance)
- While performance has been on the decline throughout 2022, our investments are on par (if not slightly ahead) of the benchmark
- Overall, 2022 was a tough year, though we saw it begin to rebound in the last quarter
- Fixed Income
- Fidelity US Bond under-performed.
- Dodge & Cox Global outperformed
- If we fall into a recession, we may move away from the Federal Hermes fund
- Equity
- JP Morgan Growth under-performed against benchmark
- NBT's investment strategy has been value over growth, which has benefited the Large Cap funds. Value investing can mean gains over the longer-term

LEAP Defined Pension Plan fund – in summary

- Market value of the fund is just over \$3.2M
- 36 basis points in fees assessed to the fund in December
- If we do enter in a recession, the investment manager may make slight shifts towards fixed income, away from equity.

- We have a "moderate" investment policy; committee feels that this is still an appropriate approach

<u>EPIC – Plan Valuation</u>

- Liabilities have dropped over the last 3 years significantly.
 - Higher current Interest rates is one driver
- At present, the plan liability is \$4M; with a \$3.2M market value, this brings the under-funded status to (\$800k) as of 12/31/2022 ((\$1.9M) at 3/31/2021)
- The agency may be in a position to provide cash contributions to the plan in 2023 and 2024 that could close the funding gap
- When we are closer to a funded-status, with NBT assistance we can begin to take steps to terminate the plan; this may involve turning the plan over to an insurance company to make the payments on our behalf going forward (selling the plan)
- NBT can provide assistance in the RFP process once we are ready to sell to an insurer.
- EPIC will continue to provide quarterly updates (with the funded status) as we get closer to 100% funded.

The meeting concluded at 11:03am

Respectfully submitted,

Emily Fagle, Finance Director

Table of Contents

Section 1 – Market Overview

Section 2 – LEAP Services DBPP – 00B767 – Performance 12/31/22

Section 3 – LEAP Services DBPP – 00B767 – Account Summary 12/31/22

Section 4 – Portfolio Review & Outlook

Market Overview

Executive Summary

- Searching for a "Soft Landing"
- Volatility will remain elevated
- Global Economic growth is slowing
- "Transitory" Inflation..."persistent and pervasive"
- Federal Reserve Bank talking tough
- Equity valuation metrics (S&P 500 P/E = 17xEPS) have already collapsed to historic average
- Corporate earnings remain resilient...for now
- Consumer and Corporate Balance Sheets are historically strong—a stockpile for further growth!
- Patience is a virtue in Investments! Stay in the Game!

Abundance of Risk

- ✓ Duration and scope of Russia-Ukraine conflict
- ✓ Potential for COVID resurgence
- ✓ Inflation remains persistent and pervasive
- Supply chain disruptions lingering
- ✓ Labor Shortages
- ✓ Energy Supplies
- ✓ Fed Policy
- ✓ Rising debt & deficits: How do we pay for all this?
- ✓ Potential for adverse tax policy (corporate, capital gain, dividend)
- Equity Market Concentration, Valuation and Volatility

LEAP Performance

LEAP Port Summary & Outlook

<u>LEAP Services – December 2022 Portfolio Summary</u>

- December 2022 was a negative month for the LEAP Services portfolio and markets in general, with the portfolio delivering a strong quarter and outperformance (Net of Fees) over the year-to-date benchmark numbers.
- During the month, the Fixed Income component was slightly negative with the Dodge and Cox Global Fund delivering positive performance and both the actively managed Dodge & Cox Income and Loomis Sayles Bond funds contributing to Alpha. Since inception, the actively managed Dodge & Cox Global Bond, the Federated Hermes High Yield and the passive Fidelity Inflation-Protected Bond Index continued to offer the greatest contributions.
- Within the Equity space, Value continued to outperform Growth. During both the short and intermediate
 time frames the Value biased holdings Columbia Dividend Income Fund and the Diamond Hill Small-Mid
 Cap, continued to offer the greatest contribution to alpha. The long-term Growth vs Value
 outperformance gap continues to narrow.
- Both the Developed International and the Emerging Market holdings slightly underperformed the benchmark in December, giving back some of the strong quarterly gains. Over the longer term, strong individual performance from the Value biased funds the Dodge & Cox International Fund, and the DFA International Small Co. Fund continued to be the positive contributors.

<u>LEAP Services – December 2022 Portfolio Summary</u>

- The Real Asset (Natural Resources/REIT/Global Infrastructure) segment was not immune to the negative performance in December performing in-line with respective benchmarks. Real Asset exposure offered positive returns during 4th Quarter and over the Short and Long-term continued to benefit portfolio alpha.
- The Portfolio (NET of Fees) underperformed the benchmark by -.29bps. (-2.38% vs. -2.09%) during the month of December, with strong quarterly outperformance of +.22 bps vs. the benchmark (+7.11 vs. +6.89). Y-T-D thru 12/31/22 the portfolio (NET of Fees) outperformed by +.72 bps (-12.68% vs. -13.40%) vs. the benchmark.
- Since Inception performance (NET of Fees) trailed the benchmark by -.34 bps (3.94% vs. 4.28%) for the period ending 12/31/22, continuing to narrow the margin of underperformance (NET of Fees) over year end 2021 (-.71%) and 2020 (-1.16%).
- The Portfolio Fund Expense Ratio stood at .36% for the month of December.

LEAP Services - December 2022 Portfolio Outlook

- Maintain exposure to broadly diversified core credit within the Intermediate and Multi-Sector spaces
 with continued allocation to the International and High Yield segments to mitigate interest rate
 volatility and risk.
- Continue to be positioned to benefit from the Value tilt, both domestically and internationally, a theme that has added alpha to our results over the past year and which we remain committed.
- Real Asset (Natural Resources/REIT/Global Infrastructure) exposure to continue with tactical shifts as inflationary pressures warrant.
- Over the past year, 65% of the funds have outperformed their peer group average. For the 3-year and 5 Year time frames, 65% and 75% of the funds have done so, respectively. Of the funds that have a 10-year history, 75% are beating their peer group averages. The quality and long-term performance of our funds continues to be solid.
- We will continue to analyze each fund and the overall composition very diligently to make sure we are putting forward the best portfolio we can in a cost-effective manner.

L.E.A.P Services Defined Benefit Plan

Pension Plan Update

January 2023

Estimated Plan Termination Cost

The ultimate cost of terminating the plan depends on many factors. Generally, plan liabilities are settled through a combination of lump sums to eligible participants and annuities purchased with an insurance company in the name of the participants.

\$millions	03/31/2021	03/31/2022	12/31/2022
Liabilities	5.5	4.8	4.0
Market Value of Assets	3.6	3.7	3.2
Deficit	(1.9)	(1.1)	(8.0)
Funded Ratio	65%	77%	80%
Discount Rate	2.50%	3.30%	4.40%

Plan termination estimate is based on the April 1, 2022 actuarial valuation. Actual results may differ, possibly significantly, from this projections due to changes in the assumptions, provisions, census data, and actual experience of the plan.

^{*}Assumes 70% of participates elect a lump-sum – actual lump-sum take rate and insurer pricing will impact final funding requirement.
